PROFESSIONAL SUMMARY

AI Business Operations Specialist trained through a 12-week applied accelerator, delivering a full consulting engagement for a multi-site healthcare client, from operations audit and business analysis through process mapping, automation proposal, KPI dashboard and executive pitch. Diagnosed five operational inefficiencies and quantified an estimated £40,000 of recoverable annual revenue, then sequenced the AI and automation roadmap to recover it. Six years in front-line health and social care sits behind this work: a compliance-first culture built on safeguarding, the Mental Capacity Act, Deprivation of Liberty Safeguards and risk assessment — the same discipline responsible AI adoption and data governance demand, plus real understanding of how clinical services run day to day. Now seeking an AI business operations role where process improvement, analysis and responsible AI adoption produce measurable results.

Target roles: AI Operations Specialist · AI Adoption / Enablement Coordinator · Business Operations Coordinator · Operations Analyst · Process Improvement Assistant · Project Coordinator · PMO Assistant — with particular interest in health, social care and third-sector organisations

SELECTED HIGHLIGHTS

- Delivered an end-to-end AI business operations engagement — audit, charter, business analysis, process map, automation proposal, KPI dashboard, governance register, vendor scorecard and executive pitch — as part of a 17-piece professional portfolio.
- Quantified an estimated £40,000 in annual recoverable revenue in an operations audit of a five-site healthcare group, ranking every recommendation by impact, effort and urgency.
- Applies ChatGPT and Claude daily to research, analysis, process documentation and stakeholder communication — with a governance-first habit of verifying outputs and protecting sensitive data before anything is shared.
- Holds fourteen UK health and social care certificates covering safeguarding, the Mental Capacity Act, DoLS, medication, infection control and risk assessment — a regulatory grounding that transfers directly to AI governance and data handling.

CORE COMPETENCIES

AI Enablement & Automation: Prompt Engineering · AI Use-Case Identification · Workflow Automation · Output Quality Review · Responsible AI Use & Governance · AI Vendor Due Diligence

Operations & Improvement: Business Operations · Process Improvement · Process Mapping · SOP Development · Service Coordination · Project Coordination

Analysis & Reporting: Business Analysis · Requirements Gathering · SWOT Analysis · Stakeholder Mapping · KPI Reporting & Dashboards · Data Analysis

Governance & Compliance: Safeguarding · Confidentiality & Data Sensitivity · Risk Assessment · Policy & Legislation Awareness · Multi-Agency Liaison

AI BUSINESS OPERATIONS EXPERIENCE

AI Business Operations Specialist — Applied Programme

June – September 2026

JesTech Academy, Cohort #1 | London / Remote — live consulting engagement; graduating 24 September 2026

- Selected for Cohort #1 of a 12-week applied accelerator: 8–10 hours weekly building 17 assessed portfolio deliverables for a single consulting client, evaluated on delivered work rather than written exams.
- **Curriculum covers:** business operations, project management, business analysis, process improvement and workflow automation, AI governance, data analysis and dashboarding, professional communication and executive presentation.
- Apply ChatGPT and Claude across research, analysis, process documentation and client communication, quality-checking every output for accuracy, tone and data sensitivity before it is used.

AI CONSULTING PROJECTS & PORTFOLIO

Brightpath Health Clinic — End-to-End Business Transformation

June – September 2026

Consulting case study: 5 clinics, 25 staff, approx. £2m revenue, West Midlands | Full portfolio: 17 pieces, complete 24 September 2026

- **Operations audit** — diagnosed five operational inefficiencies across manual scheduling, fragmented records and absent reporting, and quantified their combined impact at an estimated £40,000 in recoverable annual revenue.
- **Project charter** — defined scope, milestones, risks, dependencies and success measures, giving the client sponsor one reference for what lands when.

- **Business analysis report** — SWOT analysis and stakeholder mapping across clinical, admin and leadership groups, translated into prioritised requirements.
- **Process mapping** — documented current-state scheduling and record-keeping workflows, then designed the future state and supporting SOPs.
- **Automation proposal** — specified AI and workflow automation for the highest-impact bottlenecks, with human review points and data-handling rules.
- **KPI dashboard** — built a Looker Studio dashboard giving leadership first-time visibility of utilisation, throughput and performance against target.
- **AI Governance Register & Vendor Due-Diligence Scorecard** — logged each AI use case against risk, ownership and data sensitivity, and scored vendors on security, compliance, cost and fit.
- **Executive pitch** — presented the transformation case and roadmap to the client founder for a funding decision.
- **Reusable AI assets** — a documented prompt library and workflow templates a team can reuse without specialist support.

EARLIER EXPERIENCE — HEALTH & SOCIAL CARE

Support Assistant

June 2019 – June 2020

L'Arche London | London, UK — voluntary role

- Supported adults with learning disabilities in a community-living setting, delivering personal care in a way that built independence rather than dependence.
- Liaised with district nurses, GPs and other healthcare professionals to coordinate care and escalate changes in a client's condition promptly.
- Held supervisory responsibility across day, night and sleep-in shifts, and maintained accurate records and incident reports in line with safeguarding, medication and health-and-safety policy.

Support Worker

January 2014 – May 2019

Hope for Life Ghana | Accra, Ghana

- Supported people with disabilities in Accra to gain recognition, dignity and self-sufficiency as an alternative to street begging.
- Coordinated peer support groups linking clients to shared experience, resources and local services, and counselled people living with HIV — handling sensitive personal information with strict confidentiality.
- Worked with NGO, bank and donor partners to fund clients' medical costs — early stakeholder management and case coordination.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AI Business Operations Specialist Programme (Cohort #1)** — JesTech Academy; graduating 24 September 2026 with a 17-piece portfolio and live consulting capstone.
- **Safeguarding, mental capacity & equality (2019)** — Principles of Safeguarding in Health and Social Care · Introduction to the Mental Capacity Act · Introduction to Deprivation of Liberty Safeguards · Supporting Equality and Diversity in Care.
- **Clinical, safety & compliance (2019)** — Medication in Care (Core Module) · Working with Medication and Health Care Tasks · Supporting People with Autistic Spectrum Condition · Dementia Awareness · Handling of People · Health, Safety and Risk Assessment · Infection Prevention and Control · Food Safety, Nutrition and Hydration · Promoting Fire Safety · Emergency First Aid at Work.
